

TABLE OF CONTENTS

Materials

316L Surgical Steel	002-030
Black Steel	031-039
Zircon Steel	040-042
Gold Plated Steel	043-045
Anodised Steel	046-047
Titanium	048-052
Black Titanium	053-054
Crystalline	055-059
BioFlex® 	060-074
PTFE (POLY TETRA FLUORO ETHYLENE)	075-076
Gold Jewelry	077-078
Organics	079-095
Pyrex	096-097
Synthetic Pearls	098-099
UV Jewelry	100-135

Picture Jewelry

Picture Jewelry	136-145
Mother Of Pearl	146-147
Glitterline	148-149
Carbon Fiber	150-151
Enamel	152-155

Special jewelry

Nose Studs	156-167
Internally Threaded Jewelry	168-180
Nipple Jewelry	181-185
Intimate Piercings	185-186
Tragus And Helix Piercings	187-188
Fake Piercings	189-196
Ear Studs	197-198
Ear Hoops	199
Sterile Jewelry	200-204
Fashion Bananas	205-240
Charms	241-248
Displays	249-254
Tools	255-257
Specials	258-266

Attachments

All the attachments on the right are available in Straight barbells (BL), Bananas (BN), Circular barbells (CB), Spirals (SP) and Labrets (LB). To order, write the code for the type of item you want (BL, BN, CB, SP, LB) followed by the code of the attachment you want on it.

Tous les accessoires sur la droite peuvent être commandés en Barbells droits (BL), Bananes (BN), Barbells circulaires (CB), Spirales (SP) et Labrets (LB). Pour commander, écrivez le code du type de barre que vous désirez (BL, BN, CB, SP, LB) suivi par le code de l'accessoire que vous voulez sur cette barre.

Todo los accesorios a la izquierda son disponibles en Barra Derecha (BL), Banana (BN), Barra Circular (CB), Espiral (SP) y Labret (LB). Para pedir joyería, escribir primero el código del tipo de Barra que desea (BL, BN, CB, SP, LB) seguido por el código del Accesorio que acompaña esta Barra.

All Zubehörteile auf der linken Seite sind erhältlich für die geraden Barbells (BL), Bananen (BN), kreisförmigen Barbells (CB), Spiralen (SP) und Labrets (LB). Um diese zu bestellen, schreiben Sie den Artikel-Code des Artikels (BL, BN, CB, SP, LB) gefolgt von dem Artikel-Code des Zubehörs auf.

BLACK STEEL

Black steel is Surgical steel 316L coated by using a PVD process (Physical vapor deposition). The coating is extremely resistant to scratches.

L'acier chirurgical 316L "Black steel" est recouvert à l'aide d'un système PVD (Physical vapor deposition - dépôt physique par vapeur). Ce recouvrement résiste très bien aux égratignures.

El acero quirúrgico 316L "Black steel" está chapado con ayuda de un sistema PVD (Physical vapor deposition) . Este chapado resiste bien muy a los rasguños.

Schwarzer Stahl ist aus chirurgischem Stahl 316L, welcher in einem PVD-Prozess (eine physikalische Dampfabsetzung) beschichtet wird. Diese Schicht ist gegen Kratzer extrem beständig.

ZIRCON STEEL

Zircon steel is Surgical steel 316L coated by using a PVD process (Physical vapor deposition). The coating is extremely resistant to scratches.

L'acier chirurgical 316L "Zircon steel" est recouvert à l'aide d'un système PVD (Physical vapor deposition - dépôt physique par vapeur). Ce recouvrement résiste très bien aux égratignures.

El acero quirúrgico 316L "Zircon steel" está chapado con ayuda de un sistema PVD (Physical vapor deposition). Este chapado resiste bien muy a los rasguños.

Zircon Stahl ist aus chirurgischem Stahl 316L, welcher in einem PVD-Prozess (eine physikalische Dampfabsetzung) beschichtet wird. Dieses Schicht ist gegen Kratzer extrem beständig.

ANODISED STEEL

In order to anodise Surgical steel 316L, we first plate it with Titanium. The colors are then much brighter than on normal Titanium. Anodised surgical steel is not suitable for tongue piercings.

Pour pouvoir anodiser l'acier chirurgical 316L, nous devons d'abord le plaquer au titane. Les couleurs obtenues sont beaucoup plus brillantes que sur du titane pur. L'acier anodisé ne peut être utilisé pour les piercings de langue.

Para poder anodizar el acero quirúrgico 316L, tenemos en primer lugar que chaparlo al titanio. Los colores obtenidos son mucho más vibrantes que sobre titanio puro. El acero anodizado no puede utilizarse para los piercings de lengua.

Um chirurgischen Stahl 316L zu anodisieren, überziehen wir ihn zuerst mit Titan. Die Farben sind dann viel heller als auf normalem Titan. Anodisierter chirurgischer Stahl ist nicht für Zungenpiercings verwendbar.

TITANIUM

Grade 23 Titanium (6AL-4V-ELI) is compliant with the European Nickel directive of 2001 for initial piercings. It is Biocompatible and can be anodised in many colors.

Le Titane grade 23 (6AL-4V-ELI) répond aux normes émises dans la directive Européenne sur le Nickel de 2001 pour les piercings de première pose. Il est bio compatible et peut être anodisé en plusieurs couleurs.

El Titanio grado 23 (6AL-4v-eli) responde a las normas emitidas en la Directiva Europea sobre el Níquel de 2001 para los piercings de primera puesta. Se puede anodizar, es biocompatible y existe en varios colores.

Titan Grade 23 (6AL-4V-ELI) entspricht genau der Europäischen Nickel-Richtlinie von 2001 für den Ersteinatz von Piercing. Es ist biokompatibel und kann in vielen Farben anodisiert bzw. beschichtet werden.

In cases where BioFlex® comes in many colors,
if a color is not specified, we will provide Clear (CL).

BIOFLEX®

BioFlex is an excellent piercing material
BioFlex can be steam sterilized or autoclaved
BioFlex is highly bio-compatible. It reduces the chances of any allergic reaction to almost zero.
BioFlex has zero Nickel content and fully complies with the European Union Nickel Directive.
BioFlex is adjustable. Just cut it with a sharp blade. Once the piercing has healed, the BioFlex shaft can be shortened again.
BioFlex is highly flexible and bends with the body for ultimate comfort.
BioFlex is transparent and is perfect when used as piercing retainers.
BioFlex is a medical grade plastic that passed successfully the USP (United States Pharmacopoeia) testing including the class VI biocompatibility test. BioFlex complies to the European Pharmacopoeia (1997) Regulations.

Le Bioflex est excellent pour faire le piercing
Le BioFlex peut être stérilisé à la vapeur ou passé à l'autoclave.
Le BioFlex est bio-compatible. Il réduit les chances d'infection à presque zéro.
Le BioFlex ne contient pas de Nickel en accord avec la directive Européenne sur le Nickel.
Le BioFlex est ajustable. Il n'y a qu'à le couper avec une lame tranchante. Une fois le piercing cicatrisé la barre de BioFlex peut être recoupé.
Le BioFlex est très flexible et se plie avec le corps pour un meilleur confort.
Le BioFlex est transparent et est parfait pour cacher les piercings.
Le BioFlex est un plastique de type médical qui a passé avec succès les test USP (United States Pharmacopoeia) et agréé à la classe VI de Biocompatibilité.
Le BioFlex agréé aux exigences stipulées dans la Pharmacopée Européenne (1997).

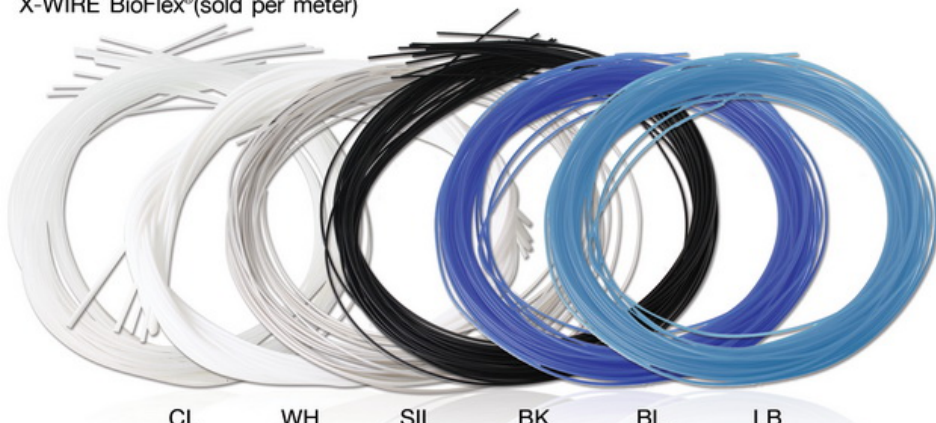

BioFlex es un excelente material para perforación
BioFlex puede esterilizarse por vapor o pasar por el autoclave
BioFlex es altamente biocompatible. Reduce el riesgo de reacción alérgica casi a cero.
BioFlex no contiene Níquel de acuerdo con la Directiva Europea sobre el Níquel.
BioFlex es ajustable. Se corta simplemente con una navaja. Una vez que la perforación ha sanado, la barra BioFlex puede ser recortado otra vez.
BioFlex es muy flexible y se dobló con el cuerpo para un mejor confort. BioFlex es transparente y es perfecto para disimular las perforaciones.
BioFlex es un plástico de grado médico que cumple con las pruebas USP (United States Pharmacopoeia) incluyendo las pruebas de biocompatibilidad de clase VI
BioFlex cumple con las normas de farmacoepa Europea

BioFlex eignet sich hervorragend für den Piercing-Bereich.
BioFlex ist sowohl im Heissluftsterilisator als auch im Autoklav sterilisierbar.
BioFlex ist absolut biokompatibel. Die Gefahr allergischer Reaktion ist gleich Null.
BioFlex enthält keinerlei Nickel und entspricht völlig der Europäischen Nickelverordnung.
BioFlex passt sich an, schneiden Sie es mit einer Klinge auf die gewünschte Länge zurecht. Sobald das Piercing abgeheilt ist, kann der BioFlex Stab entsprechend gekürzt werden.
BioFlex ist sehr biegsam und passt sich bequem jeder Körperbewegung an.
BioFlex ist transparent und die optimale Lösung als Ersatz für Piercingschmuck.
Bioflex ist ein Medizinischer Grad Kunststoff, der erfolgreich den USP (Vereinigten Staaten Pharmakopöe) und den Klasse VI Biokompatibilitätstests bestanden hat. Bioflex erfüllt die Richtwerte der Europäischen Pharmakopöe Bestimmungen von 1997

Protect your piercings with BioFlex® "Push Fit" balls. Attach the "Push Fit" ball on any BioFlex® piercing by twisting and pushing it on the bar. The ball will then be securely attached to the bar but still pop out in case something pulls hard enough on the piercing. This can prevent the piercing from tearing. We do not recommend the use of "Push Fit" balls for tongue piercings.

Protégez vos piercings avec les boules BioFlex® "Push Fit". Attachez ces boules sur n'importe quel piercing en BioFlex® en les poussant sur la barre. La boule sera ainsi fixée assez solidement à la barre mais sautera quand même si quelque chose tire assez fort sur le piercing. Cela peut protéger les piercings contre un déchirement possible. Nous ne recommandons pas l'utilisation de boules "Push Fit" dans les piercings de langue.

Proteja sus piercings con las bolas BioFlex® "Push Fit". Fije estas bolas sobre cualquier piercing en BioFlex® empujándolos sobre la barra. La bola así se ligará bastante firmemente a la barra pero saltará a pesar de todo si algo extrae bastante el piercing. Eso puede proteger a los piercings contra un desgarramiento posible. No recomendamos la utilización de bolas "Push Fit" en los piercings de lengua.

Schützen Sie Ihr Piercing mit BioFlex® "Push Fit" Kugeln. Die "Push Fit" Kugel wird einfach durch Drücken und Drehen auf dem BioFlex® Stab angebracht. Die Kugel sitzt sicher auf dem Stab, löst sich aber wenn fest am Piercing gezogen wird. Dies kann das Piercing vor einem Einreißen schützen. "Push Fit" Kugeln sind nicht für Zungenpiercing geeignet.

These balls can be threaded on any steel or Titanium shaft. They are perfect to protect teeth in a tongue piercing

Ces boules peuvent se visser sur n'importe quelle barre en acier ou titane. Elles sont parfaites pour protéger les dents avec un piercing de langue.

Estas bolas pueden ser enroscadas en cualquier barra de acero o Titanio. Son perfectas para proteger los dientes en una perforación de lengua.

Diese Kugeln passen auf Stahl- und auch auf Titanstäbe. Sie schonen den Zahnschmelz bei Zungenpiercings.

BIOFLEX®

PTFE (POLY TETRA FLUORO ETHYLENE)

1.2 mm / 16 ga

PTFE is flexible and can be cut to any desired length. It can be sterilised (up to 260 degrees) and does not cause any allergic reactions (Nickel free). PTFE is self threading with any ball.

Le PTFE est flexible et peut être coupé dans n'importe quelle longueur. Il peut être stérilisé (jusqu'à 260 degrés) et est hypoallergénique. Le filetage du PTFE se fait automatiquement en visant n'importe quelle boule sur les tiges.

El PTFE (POLITETROFLUORETILENO) es flexible y puede ser cortado en cualquier longitud. Puede esterilizarse (hasta 260 grados) y es hipoalérgico. El roscado del PTFE se hace automáticamente roscando cualquier bola sobre las barras.

PTFE ist flexibel und kann zu jeder möglichen gewünschten Länge zugeschnitten werden. Es kann entkeimt werden (-200°C bis zu +260°C) und verursacht keine allergischen Reaktionen (Nickelfrei). PTFE schneidet das Gewinde selbst.

Double jeweled
bananas

Length :	10 mm	
Balls :	4/6 mm	4.5/8, 5/8 mm

ORGANICS

Our Organic jewelry is made from water buffalo bone and horn. These materials are a by product and no animals were hurt in the process. Organic materials absorb the oil and sweat produced by the body around large piercings thus reducing odors.

Nos bijoux Organiques sont fabriqués à partir d'os et cornes de buffles. Aucun animal n'a été blessé pour obtenir ces matériaux. Les bijoux organiques absorbent les huiles et la transpiration produit par le corps autour de gros piercings et aident ainsi à réduire les odeurs.

Nuestras joyas Orgánicas se fabrican a partir de hueso y cuernos de búfalos. Ningún animal fue herido para obtener estos materiales. Las joyas orgánicas absorben los aceites y la transpiración producidos por el cuerpo alrededor a grandes piercings y los ayudan así a reducir los olores.

Unsere organische Bijouterie wird von Wasserbüffelknochen und -horn hergestellt. Diese Materialien sind ein Abfall- und Nebenprodukt und keine Tiere wurden deswegen verletzt oder getötet. Organische Materialien absorbieren Öl und Schweiß, welcher der Körper an der gedehnten Piercingstelle produziert, und folglich werden dadurch auch Gerüche verringert.

Medical grade Pyrex (Borosilicate) is completely non-porous. It is completely hypoallergenic and lead / Barium free. It is an extremely strong glass. It maintains a comfortable temperature in extreme weather conditions and will not freeze to the ear or crack.

Le Pyrex médical (Borosilicate) n'a aucun pores. Il est hypoallergique et ne contient aucun plomb ou barium. Ce type de verre est extrêmement résistant. Le Pyrex se maintient à une température confortable sans craquer même dans des conditions climatiques extrêmes.

El Pyrex médico (Borosilicato) no tiene ningunos poros. Es hipalérgico y no contiene ningún plomo o bariun. Este tipo de vidrio es extremament resistente. El Pyrex se mantiene a una temperatura confortable sin romperse incluso en condiciones climáticas extremas.

Medizinischer Grad Pyrex (Borosilicat) ist vollständig porenfrei. Es ist vollständig hypoallergen und Leitungs- und Bariumfrei. Es ist ein extrem starkes Glas. Es behält eine angenehme Temperatur auch bei extremen Wetterbedingungen und wird nicht am Ohr einfrieren oder zerspringen.

UV JEWELRY

Acrylic is not autoclavable. If soaked in alcohol, it could crack or become matt. UV acrylic jewelry should only be used in healed piercings.

L'acrylique ne peut être stérilisé. Trempé dans l'alcool, les bijoux peuvent craquer ou perdre leur transparence. Les bijoux en acrylique ne doivent être utilisés que pour des piercings cicatrisés.

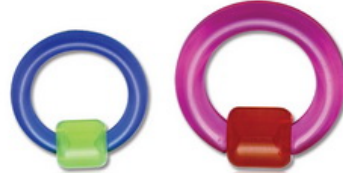

El acrílico no puede esterilizarse. Puestas en el alcohol, las joyas pueden romperse o perder su transparencia. Las joyas en acrílico tienen que ser utilizadas para piercings curados.

Acryl ist nicht autoklavierbar (sterilisierbar), denn es kann matt und rissig werden, wenn es mit Alkohol in Berührung kommt. UV-Acryl-Schmuck sollte nur bei geheilten Piercings verwendet werden.

Gauge : 4, 5, 6, 8, 10, 12, 14, 16, 18, 20 mm

UV JEWELRY

SPORING

Silicone "Cog wheel" O rings

Diameter : 3, 4, 5, 6, 8, 10, 12 mm

SPL1

Silicone plug with star

SPL2

Silicone plug with heart

SPL3

Silicone plug with iron cross

Gauge : 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26 mm

STN1

Silicone spikey flesh tunnels

Gauge : 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26 mm

UV BALLS

1.2 mm / 16 ga

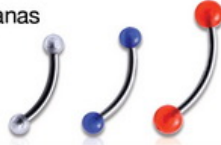

UV Balls

MUB
Balls
for 1.2 mm / 16 ga

MBNU
Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Balls :	2.5, 3, 4 mm

MUC
Cones
for 1.2 mm / 16 ga

MBNUC
Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Cone :	3, 4 mm

Glow in the dark balls

MGDB
Balls
for 1.2 mm / 16 ga

MBNGD
Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Balls :	3 mm

MGDC
Cones
for 1.2 mm / 16 ga

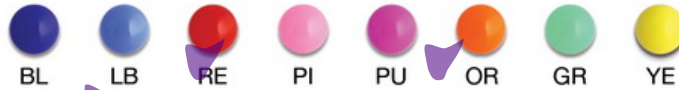

MBNGDC
Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Cone :	3 mm

Neon balls

MNEB
Balls
for 1.2 mm / 16 ga

MBNNE
Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Balls :	3 mm

MNEC
Cones
for 1.2 mm / 16 ga

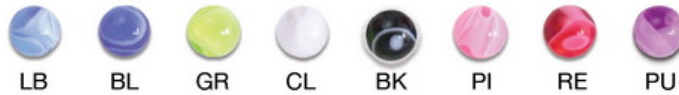

MBNNEC
Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Cone :	3, 4 mm

UV marble balls

MUMB
Balls
for 1.2 mm / 16 ga

MBNUM
Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Balls :	3 mm

MUMC
Cones
for 1.2 mm / 16 ga

MBNUMC
Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Cone :	3 mm

Wave candy uv balls

MWCB
Balls
for 1.2 mm / 16 ga

MBNWC
Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Balls :	2.5, 3 mm

MWCC
Cones
for 1.2 mm / 16 ga

MBNWCC
Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Cone :	3 mm

UV BALLS

1.2 mm / 16 ga

Psychedelic uv balls

MPSB

Balls
for 1.2 mm / 16 ga

MBNPS

Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Balls :	2.5, 3 mm

MPSC

Cones
for 1.2 mm / 16 ga

MBNPSC

Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Cone :	3 mm

Wave candy uv balls

MUMSB

Balls
for 1.2 mm / 16 ga

2.5 mm not available in BL/GR

MBNUMS

Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Balls :	2.5, 3 mm

MUMSC

Cones
for 1.2 mm / 16 ga

MBNUMSC

Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Cone :	3 mm

Web uv balls

MWUB

Balls
for 1.2 mm / 16 ga

MBNWU

Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Balls :	2.5, 3 mm

MWUC

Cones
for 1.2 mm / 16 ga

MBNWUC

Micro bananas

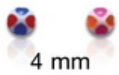

Length :	5, 6, 7, 8, 9, 10, 12 mm
Cone :	3 mm

Heart uv balls

MHUB

Balls
for 1.2 mm / 16 ga

MBNHU

Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Balls :	4 mm

MHUC

Cones
for 1.2 mm / 16 ga

MBNHUC

Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Cone :	4 mm

UV glitter murano balls

MGBM

Balls
for 1.2 mm / 16 ga

MBNGM

Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm
Balls :	2.5, 3 mm

MGMC

Cones
for 1.2 mm / 16 ga

MBNGMC

Micro bananas

Length :	5, 6, 7, 8, 9, 10, 12 mm

STERILE JEWELRY

There are two types of sterilisation:

- physical sterilisation through heat or radiation
- chemical sterilisation

Radiation is not suitable for body jewelry as components like stones will change color.

Heat (autoclave) works well but the jewelry should be used very soon after the sterilisation process which is not always practical. In general, surgical instruments that enter the body must have a high sterility assurance level. Ethylene Oxide (E.O.) sterilisation gives us this assurance. E.O. penetrates well, moving through paper, cloth, and some plastic films and is highly effective as it kills bacteria, mold, and fungi. Jewelry sterilised with E.O. will remain sterile for approximately 5 years when kept away from the light.

Il existe deux méthodes de stérilisation:

- Méthode physique par la chaleur ou par radiation
- Méthode chimique

La radiation n'est pas adéquate pour les bijoux de piercing car certains matériaux et pierres changeront de couleur. La chaleur (autoclave) fonctionne bien mais les bijoux doivent être utilisés rapidement après la stérilisation, ce qui n'est pas toujours pratique. En général, l'assurance de stérilité des instruments chirurgicaux qui entrent dans le corps doit être très élevée. La stérilisation par Oxyde d'Éthylène (O.E.) nous offre cette assurance. L'O.E. pénètre bien, traversant le papier, les textiles et même certains plastiques et est extrêmement apte à tuer les bactéries, les moisissures et les champignons. Les bijoux stérilisés par O.E. resteront stériles pour environ 5 ans si ils sont gardés à l'écart de la lumière.

Existen dos tipos de esterilización:

- física por medio del calor o de la radiación.
- química.

La radiación no está adecuada para la bisutería de piercing porque algunos materiales y piedras cambiarían de color. El calor (autoclave) funciona bien pero la bisutería tendrá que ser utilizada rápidamente después de la esterilización, lo cual no resulta siempre muy cómodo. En general, el nivel de esterilidad de los instrumentos quirúrgicos que entran en el cuerpo tiene que ser muy elevado. La esterilización por medio d'Óxido de Etileno (O.E) os lo asegura. O.E penetra bien, a través del papel, del tejido hasta de algunos plásticos y se revela muy apto a matar bacterias, mohos y hongos. La bisutería esterilizada por medio de O.E permanecerá estéril durante más o menos 5 años si se mantiene fuera de la luz.

Es gibt zwei Arten der Sterilisation

- physische Sterilisation durch Hitze oder Strahlung
- chemische Sterilisation

Strahlung ist nicht geeignet für Körperschmuck, da Komponenten wie z. B. Steine die Farbe ändern. Hitze (Autoclave) funktioniert sehr gut, aber der Schmuck sollte schnell nach der Sterilisation verwendet werden, was aber nicht immer praktikabel ist. Im Allgemeinen sollten chirurgische Instrumente, die in den Körper eindringen, höchstgradig steril sein. Ethylenoxid (E.O.) gibt uns diese Sicherheit. E.O. durchdringt sehr gut Papier, Kleidung und einige Plastikfilme und bekämpft äußerst effektiv Bakterien, Schimmel und Pilze. Wenn mit E.O. sterilisierter Schmuck dunkel gelagert wird, bleibt er für ca. 5 Jahre steril.

INP

Insertion pins

Gauge	Size (From → To)	Length
1.2 mm	1 mm → 1.3 mm	50 mm
1.6 mm	1 mm → 1.7 mm	50 mm
2 mm	1.2 mm → 2.1 mm	50 mm
2.4 mm	1.6 mm → 2.5 mm	50 mm
3.2 mm	2 mm → 3.3 mm	50 mm
4 mm	2.4 mm → 4.1 mm	50 mm
5 mm	3.2 mm → 5.1 mm	50 mm
6 mm	4 mm → 6.1 mm	50 mm
7 mm	4.4 mm → 7.1 mm	50 mm
8 mm	5 mm → 8.1 mm	50 mm
9 mm	5.2 mm → 9.1 mm	50 mm
10 mm	6 mm → 10.1 mm	50 mm
11 mm	6.2 mm → 11.1 mm	50 mm

*NB : It is not possible for the thread of a 1.2 or 1.6 mm barbell to fit completely in an insertion pin.
The insertion pin would have to be much bigger to accommodate the thread.*
